Site Selected For Provincial Parliament Buildings

Development Awaits Only Transportation

J. W. Swiggert Predicts an Era of Great Activity in the North Country When Railways and Waterways Give Easy Access to Its Riches

Perished From Cold

IN CLEVELAND, OHIO, YESTERDAY

Cold Wave With Heavy Snow Storm Traverses the State Along the Lake Front.

(Bulletin Special)

Cleveland, Ohio, Oct. 12.—The storm continued unabated today, heavy snow falling steadily. John Reiss, eighty-five years of age, was found frozen to death in his home today. He lived alone.

GOLD IN PENNSYLVANIA.

(Bulletin Special)
Pittsburg, Pa., Oct. 12.—All records show low temperature in October since that which was established in 1871 were broken today when the mercury dropped 28 degrees.

asphaltum springs and the many other indications and natural by-products of petroleum have been sufficiently advertised. On the way down I visited the well at Fort McMurray. But I do know that there is a wonderful rich country on the other side of the Whitewater on the Athabasca that will some day attract the attention of the world. At present its development is impossible and the transportation problem must be settled before any real progress can be made."

"I am not an engineer," says Mr. Swiggert, "and consequently I do not know how much it would cost to open the Athabasca for steamers from Grand Rapids down to Fort McMurray. But I do know that there is a wonderful rich country on the other side of the Whitewater on the Athabasca that will some day attract the attention of the world. At present its development is impossible and the transportation problem must be settled before any real progress can be made."

"The possibilities of the north are really not appreciated even by the men who travel it. There is copper and lead worth untold millions on Great Slave Lake. I myself was interested in sinking a shaft into a galena ledge on the south side of Slave Lake not far from Resolution. We went down 20 feet and the ore stayed with us in the full size of the shaft all the way down. It assayed 56 per cent lead and a good value in silver. I have had copper assays from Slave Lake ledges which went 11 to 23 per cent copper—values simply immense compared to the 3 and 4 per cent ledges which have made so many millions in the Lake Superior country. I have seen some beautiful samples of mica from the same country, brought into the posts by the Indians. As far as I know the mica possibilities have never been prospected but I am satisfied of the existence of immensely valuable deposits. As for the coal resources, they are too well known to require any comment and the wonderful gas well at Pelican Rapids, the tar and

"This is not the only salt in the north. At Salt River, 20 miles below Fort Smith, the traders pull their scows along shore and shovel up natural salt of the strongest kind. I am not a geologist to explain its presence; it may be rock salt? It may be collected there by a natural process of evaporation. However, the main point is not uncertain. The salt is there in large quantities.

"Timbering in the north is going to be a great industry in the near future. There is beautiful pine on the Peace between Vermillion chutes and its confluence with the Slave River. There is more fine timber on the Athabasca from Fort McMurray down to the lake. As soon as there is any way to get this timber out you may be sure it will be worked."

Mr. Swiggert reports a fair prospect for year in the north and the prospects favorable for another good winter this year.

City Board of Trade

MET IN MONTHLY SESSION.

Long Discussion as to Whether Committee Exceeded its Powers in the G.T.P. Case.

The regular monthly meeting of the board of trade was held yesterday afternoon in the council chamber. President Cushing, who has returned to the city was in the chair. Fifteen members were present.

A discussion arose out of the minutes with reference to the motion passed at last meeting depicting certain powers to the delegation, who presented the case on behalf of the board of trade before the railway commission at its sitting in Edmonton. Dr. Clendenan made a motion to the effect that the delegation, which consisted of Messrs. Short and Mackenzie did not present the question in the form it was intended to be presented. In this he was supported by Alderman Griesbach, who wanted to know upon what authority these gentlemen had presented the case in the way they did. Dr. Clendenan's motion wanted it published that the delegation had exceeded their instructions and misrepresented the board of trade before the commission.

The motion that was passed at the last meeting was read and showed that the delegation were instructed to prepare a case that would secure sufficient protection from any danger that might arise by the entrance of the railways into the city, and to co-operate with the council as far as the council was free to assist.

Mr. Mackenzie thought that the motion gave the delegation the widest scope.

Dr. Clendenan submitted that the delegation had to do merely with the matter of protection and had no business to deal with the question of east end or west end entrance.

Mr. Short said the motion was out of order. The board of trade had authorized a certain course which was followed, and the present motion was a misstatement. It was beneath the dignity of the board of trade to act without "little sense of what is right and proper." He held that to secure ample protection included the question of extension as well as abating the noise and smoke nuisance or securing overhead crossings.

Ald. Griesbach said the delegation had not agreed in concert with the council in the matter to which Mr. Mackenzie replied that Ald. Griesbach told him on the street the council could not act with the board of trade as the city was a partner to the agreement they were protesting against. Ald. Griesbach said that applied to the G.T.P. agreement only.

After considerable more desultory debate the motion was put and was lost, the mover and seconder being the only members who voted to censure the delegation.

New Member.
Messrs. R. B. Chadwick, R. C. Jarine, W. A. Larson and F. A. Anglin were elected members. A notice of motion was brought in by Mr. Mackenzie fixing the membership fee at \$2.25 per quarter or fraction thereof.

Assessment.
That oft-discussed matter was up again—the assessment. The committee on civic interests had been enquiring into this matter and had approved of the stand the city council has taken and also in the matter of the business assessment recommend that the rate on manufacturers be proportionately less than that of other business houses.

The committee on insurance and beautifying the city, submitted reports which were received.

THE CORRESPONDENT'S VISIT
Mr. Herbert Vanderhoof, secretary of the Western Canadian Immigration Association was present by request of Mr. Fisher, vice-president of the association and gave an interesting talk on the results of the visit of the Washington correspondents here last summer. Up to the present time 178 columns of reading matter has appeared in the American papers. He cited the case of an article by William S. Couch of Cleveland Plain Dealer, who published five different lists averaging 2000 lines. The rate per line in the Cleveland Plain Dealer is \$1.50. If these articles, which are the very highest kind of advertising, were paid for, it would exceed many times the grant of \$2,500 the Alberta Government gave to the Western Canadian Immigration Association.

Vanderhoof also informed the meeting that 204 columns of newspaper articles have up to the present appeared in the eastern papers as a result of the excursion of the lady editors' club last June.

Five Inches of Snow

IN THE VINEYARD OF ONTARIO.

A Foretaste of Winter in Many Places Throughout the Province.

Toronto, Oct. 11.—Snow covered the ground in many places throughout Ontario this morning. In the Niagara district great damage was caused by the storm, fruit growers estimating the loss at thousands of dollars. Telephone and telegraph wires are down east and west. At Niagara Falls five inches of snow fell.

Five Men Killed

IN A WYOMING WRECK.

Orders Misunderstood and two Trains Telescoped With Fatal Results.

Cheyenne, Wyoming, Oct. 11.—Five men were killed in a head-on freight collision on the Union Pacific railway near Laramie, Wyoming, last night. The dead are Engineers Frank Strong and John Murray, Firemen Wentrom and Kelly and Brakeman Meyers. The collision was caused by a misunderstanding of orders. The engines of both trains were demolished and the train crews instantly killed.

Insurance Rates

CONSIDERED BY THE BOARD OF TRADE.

Governments Will Be Asked to Appoint a Commission to Inquire Why Rates Are High.

Wire From Premier Rutherford This Morning Intimates That the Old Fort Grounds Will be Graced by New Capitol--Price and Terms Unknown----An Historic Spot

The parliament buildings' site has been selected by the provincial government.

It will be the 21 or 22 acres heretofore occupied by the Hudson Bay Fort on the foot of blocks 7 and 8 and overlooking the Saskatchewan.

The news was reported around the streets at a comparatively early hour this morning and was confirmed by M. J. McLeod, chief clerk of the executive council.

"We received a wire from Premier Rutherford this morning stating that the proposal of the Hudson Bay company for the Fort property had been accepted by the government," said Mr. McLeod.

"There was nothing in the message indicating what the terms were, so that I cannot give the price. In fact no other information was contained in the message than that the site had been selected."

Hon. W. T. Finlay, minister of agriculture, who is the only member of the cabinet in the city at present, corroborated the report.

Hon. W. H. Cushing, minister of public works, is in Calgary today, having just returned from a visit to the Pacific coast, and could not be reached this afternoon; consequently there is no announcement as to when erection of the buildings will be commenced.

The site selected is one of the most magnificent from a scenic point of view and at the same time interesting from an historical point that could be found in the whole of the last west. Years and years ago, when the buffalo roamed the plain and the Indian and fur trader were the only human inhabitants of the great lone land, the Company of One Hundred Gentlemen Adventurers selected the site as being

SUMMERSIDE SUFFERED.

Summerside, P. E. I., Oct. 11.—A

terrible fire swept over the town early

in the morning, doing damage to the jail, electric light plant, fifty houses and three churches are gone. The fire is supposed to have been incendiary.

The fire began in a railway shed and was fanned by a heavy gale. The town had only two hand engines and one steamer to fight the fire. The firemen and an engine from Charlottetown saved the Presbyterian church, extent of \$200,000. The insurance only amounts to \$50,000. The court house,

ST. LOUIS WRECK.

St. Louis, Mo., Oct. 11.—The Iron

Mountain fast mail train jumped the track today while making up lost time within the time limit, killing and injuring ten persons. The accident occurred within a short distance of where the same train was wrecked last spring.

NEWFOUNDLAND AGITATED.

St. Johns, Nfld., Oct. 11—Popula-

rization continues against the modus vivendi giving American privileges denied by Newfoundland laws. The press denounces what it terms as the government's betrayal of the country's interests.

the proper one for the seat of government. With the whole country before them they selected the site and set up the "Big House," from whence for years and years went forth the edicts which governed an area greater than many old country empires. The location of the Provincial Parliament buildings on this historic spot will doubtless meet with more general favor than any other available location.

CITY OF REFUGE.

A correspondent of the London Times, in an article from Persia, says:

According to the latest news from Teheran, the success achieved by the "reformers" in wringing the promise of a more liberal Constitution from the Shah was not altogether final, and the struggle is about to be resumed on the same lines as before. The peculiarity of this struggle is that the popular party has confined itself hitherto almost entirely to a systematic campaign of passive resistance. The tactics adopted are familiar to anyone who knows the East. In China, for instance, it has been for centuries the one effective weapon at the disposal of the non-official classes against excessive oppression from above. The great merchant guilds pass the word that business is to cease until such and an official has been removed, or such and such a measure revoked; the bazaars put up their shutters, the native banks are closed, and a paralysis of social life ensues which almost invariably brings the mandarins to their knees. Much the same procedure seems to have been adopted in Teheran, with this difference, that powerful religious influences were also mobilized, and that the objects of the movement were of a far-reaching character. The late

THE LATEST RISE IN LUMBER.

Calgary Albertan—Rough lumber has again been advanced one and two dollars per thousand, according to the grade of it by the Lumber Manufacturers' Association of British Columbia. This decision was arrived at a joint meeting of the Mountain Lumber Manufacturers' Association and the British Columbia Manufacturers' Association at a meeting held by them several days ago in Vancouver.

Immediately after arriving at this decision word was sent out to all lumber dealers throughout the North West notifying them of the action taken, that they might not be caught napping in taking contracts for future delivery. While this raise in the price of lumber will not immediately affect the building operations throughout the North West, it will still mean much to the large concourse of people who are contemplating the erection of buildings. The cause given for the rise in price is that the mills were forced to pay the price of logs had risen, wages are high, labor scarce, and above all the supply of logs is rapidly shrinking.

The car shortage is very serious at this time, and is more felt than in previous years because owing to the enormous settlement into the North West the volume of business is greater than ever before. If cars could be sent west empty the supply would be inadequate.

Matters, however, are much worse in this respect, on the other side of the line, where the car shortage is crippling business. This caused through congestion of traffic, so it is to be common thing to delay passenger train to allow three or four passenger trains to go by. In Washington state millmen are holding irrigation meetings against the railways which are powerless to relieve the situation.

MAKING TREATY WITH CREE.
 W. F. Breden, M.P.P., returned yesterday from Prince Albert where he went to be on hand when the McKenna party distributed the scrip to the half breeds of the country to the north of that town. Altogether the party distributed 230 land scrips of 240 acres each and 275 money scrips redeemable at \$240 each as payment on government land. The party also made treaty with a large number of Indians in the North Saskatchewan country. They have completed their work for the year and have gone back to Ottawa.

TEACHER SHOT.

Cleveland, Ohio, Oct. 11.—In the presence of sixty pupils in the south Euclid school this afternoon, Harry Smith, 25 years old, shot and killed Miss Mary Shepard, a teacher, aged 22 years. When brought to bay behind the barn in the rear of his home in Warrensville, two hours later, Smith shot himself through the head, dying instantly. Four Cleveland policemen with drawn revolvers and under cover of eight armed farmers, were about to rush on young Smith, when he ended his life. Disappointment in love is said to have been the motive.

THE EARL SHOOTING.
 Indian Head, Oct. 11.—Earl Grey arrived here today and left for the File Hills by automobile. He will spend a couple of days among the chickens and ducks.

Sad Accidents can be Averted

The chapter of accidents that have occurred at summer resorts this season, only say a word in favor of

Mr. E. S. Jones lectures on Thursday, Oct. 12 (Thanksgiving Day) on missionary work in the far north. The lecture will begin at 3 o'clock.

Mr. John Hart has re-purchased the Maragiag Cafe. John couldn't keep away from Edmonton and his friends are pleased to see him back in business again.

P. Burns & Co. are erecting an abattoir and cold storage building, 38 feet by 60 feet at the junction of the C. P. R. and E. Y. & P. Ry. in Strathcona. Mr. W. J. Carter is the contractor. The cost of the building will be \$5,000.

A successful and entertaining gathering of the young men of Queen's avenue Presbyterian church was held last evening. Fifty-six young men joined the club. Rev. C. A. Myers is honorary president, Mr. Saunders, president; Dr. Wells and Dr. Macaulay, vice presidents, and Dr. Fulton, secretary-treasurer. A program of songs, dialogues and recitations was given and a thoroughly enjoyable time spent by all.

The Alberta College sight-singing and ear-training class is steadily growing, and in itself offers a broad musical training that cannot be acquired through any other branch of the art. The most advanced and modern methods are employed. The public is invited to the meetings and criticism is solicited from any source. The meetings are held in the College Assembly Hall every Tuesday and Friday evenings from 7:30 to 9:30 p.m.

Mr. W. J. Horner of the Edmonton livery has begun operations on a new livery barn on First street at the corner of 10th Avenue. The building is 50 x 100 and will be two stories high, with full basement and constructed of steel, brick and cement. The ground floor will accommodate 50 horses and 40 carriages. Underneath the office will be rooms for the employees and a wash room. The stable will have a large entrance. A host from the first floor will be used to take the rigs to the second. Contractors Allan and Van Buskirk have the work in hand and expect to finish by Nov. 15th.

An interesting exhibit in natural history is to be seen at the Algonquin Pharmacy today. It consists of a number of medicinal leeches imported from Bohemia in glass cases. The leeches belong to the great family of the Platworms, and this particular variety is used by medical men to apply leeches to extract blood from bruises. It is enabled to extract blood by means of a powerful sucker which is attached to the body of the leech. They are not used for medicinal purposes until they are from twelve to eighteen months old. They are prettily colored in dark olive green with six rows of yellow spots down the back. They are found in the woods from numbers one hundred in number. Large numbers are bred in the south of France, in Bohemia and Russia and are imported into Canada and the United States.

SOCIAL AND PERSONAL.

W. F. Breden, M.P.P., for Athabasca is at the Alberta.

Mrs. Charles McKillop of Raymond, is visiting with her daughter, Mrs. McCaig.

Mr. P. E. Butchart and family have returned to the city after spending the summer at Grimsby, Ont.

A small but pleasant "Tea" yesterday afternoon was the one given by Mrs. D. S. McKenzie. The hostess, gowned in a pale blue collie, received her guests in the blue room, assisted by her sister, Miss Curry, dressed in a dainty point despit gown. The tea room was in charge of Madames Hubble and Hislop assisted by Misses Sommerville, Martin (Strathcona) McIsaac and McCauley.

Miss Maud McKinney was the hostess of a delightful dance last evening, in honor of Miss Anna Oliver and Miss Besse McKeynt of Lacombe. Mrs. McKinney assisted her daughter, gowned in a black silk gown, her daughter being dressed in white. Miss Oliver wore a white lace dress and Miss McKeynt a cream pink gown. Richardson's orchestra furnished the music. Being a mild evening the dancers wandered out on the verandah between numbers where several inviting cosy corners were arranged which did not a little to add comfort and enjoyment to the occasion.

A few of the guests were Mrs. Hislop, Misses Beck, Gascoigne, Walbridge, Matheson, McLean, Wishart, Curry, McCauley, Robertson, Lynch, Morris, Harrison, Stockland, Farinet, Burley, Babbitt, Stinson, McCarthy, Hetherington, Finn, Bishopric, Sheldan, Ferlin, Manuel, Taylor, Durie and Robertson.

Eighty-five offices throughout Canada.

A general Banking business transacted.

Interest at current rate allowed on savings deposits from \$1.00 upwards.

Drafts sold payable in any part of the world.

Special attention to Farmers' business and out of town accounts.

Collections effected promptly.

CORRESPONDENCE INVITED

Edmonton Branch : : H. A. GRAY, Agent.

To Beautify the City

COMPREHENSIVE SCHEME PROPOSED.

Board of Trade Committee Wants Boulevard Up and Down the River For Miles.

Early last summer a committee of the board of trade of this city was appointed to report on ways of beautifying the city. The result will be a comprehensive report submitted and adopted at the meeting of the board of trade yesterday afternoon.

The report advocates a boulevard along the river bank and extending at least 100 feet from the river to the city.

It recommends that the entire escarpment along the bank be used as a park and also of the Rat Creek and Great creek ravines. It recommends also that the assessor should be asked to construct a driveway along the river bank up and down stream for a distance of fifteen miles.

Mr. Short, speaking in support of the scheme said that such measures were making headway in the American cities and that large areas were being spent upon such improvements.

Mr. M. W. Mackenzie supported Mr. Short's motions to adopt the report and particularly referred to the removal of the cemetery from its present location.

Mr. P. C. Read thought the plans were too comprehensive, and objected to going beyond the city limits with any scheme of improvement.

Mr. J. H. Morris was heartily in favor of any scheme to improve the appearance of the city.

Mr. J. B. Walker thought the council and government should follow in the steps of the Ottawa council and Dominion government in beautifying the Canadian capital.

NEW PLANING MILL FOR SCONA.

Messrs. P. H. Baldwin and E. M. Fuller lately with Messrs. W. H. Martin & Co., Strathcona have entered into partnership with Messrs. Davison & Wells contractors, who have for several years been carrying on an extensive lumber business at Strathcona at their factory situated in Mainstreet. The new firm will be known as Davison and Co. They have decided to erect a two story frame planing mill 40x40 feet on the corner of Anderson avenue and Niblock street. The work will be completed in about three months. The mill will be completed before winter. Mr. Baldwin leaves next week for Toronto to purchase new machinery for use in the new building when completed.

RENNIE'S ACADEMY.

David C. Rennie's dancing academy on Third street was opened last night by the first of his informal weekly dances. These will be given every Thursday evening during the winter months.

The hall was barely finished and paraffine took the place of shavings as the floor covering for an hour before the opening, so that the large glass pane was only commencing to come on the hardwood as the evening advanced. Nevertheless the hall was comfortable and the evening pleasantly spent.

HAZEL DAVENPORT,

Who Appears Tonight in The Mascot.

MERCHANTS BANK OF CANADA.

Established 1864.

"ADVISING" OR "KNOCKING"

The Calgary Herald takes upon itself the duty of sounding "a warning note in regard to the abnormally inflated and totally unjustified figures to which real estate in Edmonton have been forced, as revealed by the recently finished assessment," finding its advice on "a despatch to the Herald," which "states that Edmonton's total assessment reaches the astonishing amount of over fifteen and a half millions, an increase of considerably more than a hundred per cent. over last year."

The Herald prefices its remarks with the assurance that it has no intention of "knocking" Edmonton, and repeats the truism that "Edmonton's prosperity and success can never hurt Calgary, and the best sentiment of this city will feel nothing but gratification over the continued growth of the northern city, for there is plenty of room in Alberta for two big towns with 200 miles between them, and the prosperity of one will help the other."

There is an understatement of truth in the Herald's article, though it both exaggerates in the statements intended to illustrate the truth and has selected a poor text for its sermon generally.

There is no fault to be found with the statement that "If the Edmonton papers and the leading citizens of Edmonton are wise they will discourage the insane tendency of speculators to boost values," nor to the acknowledged fact that "it is not in the interests of the country generally that there should be repetition of the Brandon and Portage booms, which 'busted' twenty years ago and gave Manitoba such a disastrous set-back. The same policy is always the best."

But there is very great fault to be found with the suggestion that "lots three or four miles out in the country are selling for \$500 or \$1,000," and we fancy there is nearly as great exaggeration in the hypothetical quotation of supposed visitors that "Edmonton is going ahead all right, but the people there are crazy over real estate. Look out for a big smash." That "Calgary's population is nearly twice as large as Edmonton's" does not need denial. There is also an unquestionable exaggeration in representing that the price of Calgary property has been entirely fixed by the immediate demand, and that of Edmonton entirely by the prospective demand.

Supposing, however, that in some cases the people of Edmonton have displayed an excessive optimism, and, as is by no means sure, the real purpose of the Herald is the avowed purpose of correcting such tendency, it appears to us that the subject for its homily is very ill-chosen. The lament of the Herald is that the Edmonton assessment is too high—a peculiar argument surely to use for the avowed purpose of counteracting a supposed "boom."

Admitting that Edmonton's assessment is "high," how should the announcement of how "high" it really is encourage the further inflation of the prices of which it is composed?

Or, if the prices of property in a community have risen rapidly, why or how should the knowledge of how rapid that rise has been encourage their further elevation?

The effect, we should judge, would be rather in the opposite direction, for supposing the rise in prices to have been abnormal, how can the fact that it has been abnormal be better brought home to the public mind than by officially announcing how great has been the general advance?

A "boom" is created by "discounting the future," and the greater the discount already made the less remaining to be made in the future. The more nearly property is known to now approximate its anticipated value the less surely the inducement to continue speculating on that value. On the other hand, to under-assess-

the property of a community is to deceive the owners of the property as to the total price they are now asking for it and as to how much they have overtaken its anticipated value in the past year. This surely is to lead them to believe that they still have a wider margin left for speculation than really exists. The proof of this is the fact that the class who profit most by the exchange of property and by a continuous advance in prices are the class who most resolutely oppose a "high" assessment.

Generally speaking, the tendency of a "high" assessment is to depreciate the price of property, and the most certain corrective of a "boom" is a high assessment, accompanied by a high rate of taxation.

Usually, however, the rate of taxation falls as the assessment rises. It has been understood that the high assessment of Edmonton this year would be accompanied by a rate of assessment lower than has ever been known in the city before, and probably lower also than obtains in any other city in the Dominion of Canada. The publication of this fact would be an advertisement of great value to Edmonton and of corresponding disadvantage to communities which may choose to consider themselves rivals of Edmonton. It is by no means improbable that the Herald's criticism was an effort to forestall the advertising value of our low rate of taxation by giving an uncalled-for publicity to our high assessment.

This phase of the question will be solved when our rate of taxation is published. Then, if the Herald's purpose be as disinterested as supposed, it will give as much prominence to our rate of taxation as it has given to our gross assessment.

IS RUSSIA SOLVENT?

Lucien Wolfe, in a letter to the editor of The Times, discusses the question, "Is Russia solvent?" He shows that deducting the gold held by Russia abroad, which is ear-marked for purchases and for a guarantee to holders of her debt, the metallic reserve is very far from corresponding to the note issue, and in this respect Russia is in much worse position than two years ago. Of 1,260 millions of ruble notes in circulation, 700 millions have no metallic basis, and if we deduct 300 million which by law may be issued without such basis, there still remain 400 millions uncovered, which, by law, ought to be guaranteed by gold in the treasury.

The Times says: "It is impossible to ignore the significance of this condition of affairs existing in spite of the foreign loan last April, which produced 677 million roubles. That large sum appears to have been swallowed up in the gulf of indebtedness which it is so far from filling that the treasury is worse off by 400 million roubles than two years ago."

Mr. Wolfe thinks there is only one remedy. "It is," he says, "a remedy which in like circumstances Turgot proposed to Louis XVI. in 1774, and this Kokovtsoff has happily already understood. But it is not sufficient, as Turgot pointed out, to make economies. The requisite economies must be sufficient to allow of further loans being dispensed with, and further increases in taxation being avoided they must be sufficient to serve the purposes of reconstructive, fructifying finance. The first condition of such a policy is domestic peace, founded on the reconciliation of the Czar with his subjects and their local co-operation for safeguarding the national honor and promotion of the people's good. An effective comprehension of this elementary fact is the step Kokovtsoff has yet to take, but it is encouraging to note that he is on the way."

POWERS SENT UP FOR TRIAL.

(Bulletins Special). Winnipeg, Oct. 11—Thomas Powers was sent up for trial on a charge of manslaughter at the preliminary hearing held today before Magistrate Daly. He is accused of having killed Thos. Humphries on Oct. 6th in a drunken scuffle at the Stock Exchange hotel. Alex Savage who was also under arrest on the same charge will be held on bail as a material witness.

A crusade against the social evil will be begun tomorrow. Special police will patrol the infested district taking the names and addresses of all visitors.

THE WAR IS OVER.

Washington, D. C., Oct. 12—Cable advises received here from San Domingo state that an agreement has been reached between the government and insurgent forces in the Oidorborough of Monte Cristi, whereby the insurgents will surrender to the government tomorrow and General Limardo who conducted the campaign for President Caceras will become governor of Monte Cristi.

GOODYEAR PROCESS.

The Foolish Fogey Way And
The Other Way

Many people still cling to the grand mother idea that a perfect custom made boot cannot be produced except by hand in the good, old fashioned, foolish, fogey way.

Hand made is right. A shoe should be hand made throughout and all Slater's are, but why should a shoe maker be condemned to tediously sew a shoe with awl, wax and knife at snail speed when he can do it a hundred times quicker and a hundred times better with a Goodyear Welt machine? There's no reason, except prejudice and tradition.

Every woman knows that for strength, evenness and durability, hand sewing cannot compare with the sewing machines product. Neither can hand shoe sewing compare with Goodyear machine sewing.

If you'd like a shoe without tacks, threads, stitches, lumps, hollows or roughness under the foot; if you'd like a shoe with the lock stitch which holds the sole on until worn to the thinness of paper, get a shoe that's made by the Goodyear Welt Process. As all Slater's are made by that process—Get a Slater's.

Anywhere in Canada at \$3.50 and \$4.00 for women and \$4.00 to \$5.00 for men—\$1.00 less than the best American makes and precisely the same shoe.

Canadian Life and Resources, a journal published in Montreal, and devoted largely to western topics, has the following short biography of Alberta's premier:

Shortly after Alberta and Saskatchewan became provinces on September 1 of last year, the Hon. G. H. V. Bulyea, Lieutenant-Governor of the former, called upon Mr. Alexander Cameron Rutherford, barrister of Strathcona, to become the first prime minister of his province. Mr. Rutherford accepted the position and without delay formed a government which was heartily sustained when the elections came on in the early part of the following November. That government is still in office administering the affairs of the rapidly growing province. In the Autonomy Act creating the province of Alberta passed by the federal parliament during the long session of 1905, the population was taken to be 150,000, but the quinquennial census of the three prairie provinces now being completed shows that Alberta has a population of 185,000; not large, it is true, when considered in connection with its area of 252,500 square miles, which is capable of sustaining as many Canadians as now live west of Lake Superior, who are estimated to number at least one million souls.

At the time of his appointment Mr. Rutherford was practically unknown outside of the western country, and yet, like the Hon. Walter Scott, Prime Minister of the sister province of Saskatchewan, and so many other western leaders, Mr. Rutherford is an example by birth and education—one of Ontario's sons who years ago saw the possibilities of a career offered by the western country and chose to turn these possibilities to good account.

Mr. Rutherford was born of Scottish parents on February 2, 1858, at Osgoode, Carleton County, Ontario, one of the staunchest Conservative constituencies in Canada, which is today represented in the House of Commons by Mr. R. L. Borden, leader of the Opposition. In a good Ontario public school was laid the foundation of his education, which was completed at Woosterstock College, and at McGill University, Montreal, where he graduated with the degree of Bachelor of Civil Law.

He soon entered the legal profession and began practicing in what was then always spoken of as the Northwest Territories. Entering public life through the municipal offices in the town of Strathcona, of which for a time he was the secretary-treasurer, he in due course reached the Territorial Legislative Assembly, which, under different organizations, but always with less than provincial powers, passed local laws for all that extensive country lying between Manitoba and the Rocky Mountains. In that Assembly he held the position of Deputy Speaker.

When the territories were erected into two provinces a wider field was readily opened to their public men and weighty responsibilities had to be assumed, for with one important exception the provinces were given autonomous powers similar to those exercised by the older members of the Canadian Confederation, that exception relating to the public domain which from the time of its acquisition from the Hudson's Bay Company in 1869 had been vested in the Federal Government. That Federal ownership and administration were retained on the ground that they were necessary in order to ensure uniform homestead regulations and a continuous and vigorous immigration policy directed by a central authority.

Mr. Rutherford's government has now been in office for a little more than a year, and it appears to have devoted itself ardently to the discharge of those high duties entrusted to it by the people of Alberta.

INJURED IN A HAY PRESS. Rossmere, Sask., Oct. 12.—With his left leg broken and the flesh from the back of his leg between the knee and ankle literally torn to shreds, Henry Podawlkoff, a Doukobor was rescued from a hay pressing machine yesterday morning west of town. Instead of taking a fork he used his foot, pushing the limb in so that it was caught in the machine. Should mortification not set in the limb may be saved.

A HOUSEWIFE'S EXPERIENCE. ZAM-BUK TESTED BY RESULTS. Judge a remedy by its cures. Zam-Buk has won its position by what it has done. If you have skin disease, barbers' rash, eczema, scalp sores, a troublesome ulcer, an old wound—if you have a bad cut, chapped hands, or any sore, disease or inflamed condition of the skin, give Zam-Buk a trial, and contrast what Zam-Buk can do for you with what benefit you have reaped from other preparations. To help you in this the proprietors offer a free sample box to all who send in a one-cent stamp to pay postage. Merit alone should tell in medicine.

Zam-Buk has the merit. It is compounded from the finest medicinal herbal extracts yet discovered. It is at the same time antiseptic and healing. It kills all disease germs, it builds up damaged or diseased tissue. Doctors prescribe it, nurses use it, mothers of families swear by it. "I have been keeping house for forty years, and never found anything to compare with Zam-Buk," says Mrs. Angus, of Fenelon Falls. "As a household balm ad salve it is wonderful!" Use it for chapped hands, chilblains, burns, bruises, children's injuries, etc. Also comes piles. All druggists sell at 50¢ a box, or direct from the Zam-Buk Co., upon receipt of price. 6 boxes for \$2.50.

SLID DOWN A MOUNTAIN.

Mountain climbing and a slide of 3,000 feet down a snowy slope were Prof. A. P. Coleman's School of the heroic amusements with which professor A. P. Coleman of the School of Practical Science of Toronto and his brother savants varied the monotony of the technical discussions of the Geological Congress at the City of Mexico during the past month. About 235 of the world's most eminent geologists were gathered together at the meeting, which is held only every three years, for the purpose of discussing questions of importance to scientists. Four other Canadians beside Dr. Coleman were in attendance at the conference. They were Prof. W. G. Miller, of the Ontario Bureau of Mines; Prof. Adams, of McGill University; Dr. Lowe, director of the Dominion Geological Survey; and Mr. Courtney, of Ottawa. During the deliberations of the congress Dr. Coleman read a paper on "Inter-Glacial Periods," and the Don Valley, Toronto. The as exemplified at Scarborough Heights, entertainment of the delegates was supervised by President Diaz of the Mexican Republic, who went so far as to import from Chicago two trains of Pullman cars with dining cars for the transportation of their visitors. "The Mexicans are among the most hospitable people on earth," is Dr. Coleman's conclusion after experiencing it.

As Mexico is famous as the scene of volcanic action in the past, a number of excursions were organized for the benefit of the men with the geologists' hammers and a passion for rocks. Prof. Coleman visited quite a number of the mountains and climbed three of the highest: Toluca, about 15,000 feet in height; Colima, 13,500 feet, and Orizaba, 18,500 feet. The last mentioned ranks third among the mountains of America, only Mount Togor, in the Yukon Territory and Mount McKinley, in Alaska, exceeding it in height. On the summit of the extinct volcano, Mount Toluca, was seen a beautiful lake, while on Mount Colima the explorers peered into the depths of an active crater.

"We had some hot experiences," said Prof. Coleman. "We passed through steam and sulphur fumes into the crater, and it was very uncomfortable, but not dangerous. In the trip to the summit of Orizaba, four days were occupied, although we were only two on the mountain," said Dr. Coleman. "We slept at the 13,000 foot level in a little cave between two lava sheets, and it was bitterly cold. We arose early the following morning and in four and a half hours reached the top, a distance of 4,500 feet, whence we could see a magnificent panorama of the Gulf of Mexico."

"We came down about 3,500 feet in three quarters of an hour," proceeded Dr. Coleman. "We slid down the snowy slopes with our sledges traveling behind with us like a steering gear, a process of descent known as 'glissading' in the Alps. The snow was soft on the return journey and afforded a hold for our hobnailed shoes."

"The country towns are old-world in type, altogether," said Dr. Coleman, "and suggest the countries bordering on the Mediterranean. The houses are of adobe, sun-dried bricks, with a court of patio in the centre. In the centre of every town is a public square or plaza, on one side of which is a large church. These are exceedingly interesting edifices, architecturally, and are extremely picturesque. I wish we had as attractive churches in Canada. Our churches couldn't compare with them. Of course, they are built of poor material and their decorations are crude but their style is striking and distinctive."

Dr. Coleman found the country, as a whole, quite backward, although Mexico was a modern city and was advancing rapidly with the aid of foreign capital. In its development many Canadians were interested. The Light and Power Company, of Mexico, for example, was a Canadian enterprise and one of the most important business corporations in the country. During his stay in the country Dr. Coleman met many Canadians. The majority of these were engaged in the development of the natural resources of Mexico. Some were mining engineers, while others were railway men.

The congress will meet at Stockholm three years from the present. It has been promised a treat by the Swedish government in the shape of a trip to Spitzbergen, one of the most northern accessible points in the world.

Regina teachers have formed a city association of which Hector Lang is president and Miss I. Bethune, secretary-treasurer.

A beaver colony have constructed a dam six miles east of Carstairs on the Rosebud river.

Miss Stevenson has been appointed teacher of music and singing in the Moose Jaw public school.

Stettler is to have a new skating rink to cost \$3,500.

Master Virgil Biggs of Innisfail fell 40 feet down an elevator shaft and sustained severe injuries.

Mr. Harry Anderson, of Marker-ville, Alta., lost his hand by the discharge of a gun in his wagon returning from breaking fire guards.

High River Times: An order has been passed establishing new regulations with a view to eradicating mange in cattle in the infested districts of Alberta and Saskatchewan. These provide that all cattle from that district consigned to Winnipeg or points east must be accompanied by an official certificate of health and be inspected at Winnipeg. The same must accompany cattle bound west or south, unless shipped for immediate slaughter.

A despatch from Vermilion says: Col. Sam Hughes of Lindsay, Ont., is making arrangements to set a gang of men to work on his land just west of town. Col. Hughes has reserved some 4,000 acres of land in this district and has a steam plowing outfit ready to start work at once. His outfit consists of a ten furrow Cockshutt gang plow, followed by two seven-foot disc harrows and drawn by a 32 horse-power Reeves' Traction engine.

VANCOUVER PROPERTY AT \$2,000 PER FOOT.

Province: The record price for Hastings street business property was recorded today when at the rate of \$102 per front foot was paid for the lot and building at the northeast corner of Hastings and Homer streets. This property is now occupied by the Medical Hall drug store, owned by the McDowell, Atkins, Watson Company, and carries a two-storey brick building.

The best previous price for property on this street was something over \$1,700 per front foot, paid last week by Mr. A. Grossman for the building on the south side of the street between Homer and Hamilton streets, now occupied by the Dominion Trust Company. The price paid for this was \$45,000. Prior to that sale the purchase of the Leland Hotel site by Mr. Dominick Burns at the rate of \$1,500 per front foot held the record.

Mr. Grossman is the purchaser of the Medical Hall property, and he paid the sum of \$100,000 for it. The frontage on Hastings street is fifty-two feet. The corner is one of the best business sites in Vancouver, and it is looked upon as being a remarkably good investment.

THE AUSTRALIAN TARIFF.

Ottawa, Oct. 11—D. H. Ross, Canadian agent at Melbourne in his last report to the department of trade and commerce, refers at some length to the Australian tariff proposals. He says the schedule of tariff concessions in favor of the United Kingdom is limited to a number of lines and mostly apply to goods not manufactured in Australia. If the reciprocity schedule becomes effective, the difference in rates of duty charged by Australia on certain lines of Canadian and British products would be as follows:

Great Britain, Canada.

Bicycles ad motor cars 22 33
Furniture 22 33

Plated ware 22 33

Rubber and shoes 22 33

Boots and shoes 22 33

Rubber boots 27 33

Paper hanging 16 27 1/2

Engines various 13 25

Mr. Ross remarks that while the Canadian government is willing to give a general tariff preference of 35% per cent. in favor of Australian goods the Commonwealth government would not be disposed to reciprocate to such an extent.

Would \$25.00 Buy You a New Jacket?

THAT would pay for a pretty good coat, wouldn't it, Mrs. House-keeper?

You may be actually throwing money every year—by using the ordinary steel range.

Partly because of the material it is made of, and partly because of its construction.

Steel can be riveted to steel, but on account of the expansion and contraction of heat and cold, the seams between the rivets will open up, and let in the outside air.

The oven in a range of this sort is usually flanged over and riveted, and the seams plastered with stove putty.

Soon the stove dries up and drops out; the cracks suck in cold air, and you are kept busy shoveling in coal to make fire hot enough to offset the "air leaks."

Then the door-frames on such a range are cast-iron. And because cast-iron is too brittle to stand the hammering that riveting demands, these frames are bolted—and the joints filled with stove putty.

The bolts loosen and these joints, too, open up, and more cold air comes in to cause the fire to burn slowly when you want it quick, and to keep it roaring when you want it shut off.

So you can easily see how much more a steel and cast-iron range costs you. And it becomes more expensive every year you use it.

Now, if you want to save that extra money wasted in coal, Mrs. House-keeper—

If you want to do your cooking economically and satisfactorily—buy a Monarch Range.

For the Monarch will not open up in the seams and waste fuel.

It is made of Wellsville polished steel and Malleable iron.

SHERRING THE MARATHON WINNER & ZAM-BUK'S HEALING POWER.

William Sherring, of Hamilton, Canada's hero, the winner of the Marathon race, trained on Zam-Buk and has proved its merits. He says:

"While training for my great run from Marathon to Athens, a distance of 26 miles, I used Zam-Buk and it proved a great boon to me. I have used it both as an emollient and as a salve for chafing sores, blisters caused by stepping on stones while running in light shoes, and other blisters and have found it the best salve and ointment I have ever tried. Its healing powers are exceptional, and for general household use it should be a word truly fine curative. I have pleasure in expressing my appreciation of its value."

Zam-Buk is a healing balm composed of the finest known medicinal herbal extracts. It acts as a skin food, and relieves all disused or injured tissue—pliable unscarred skin, etc., just as a builder rebuilds a damaged building. The most delicate skin—the skin of young babies can absorb it. No staining, no harmful coloring matter, no mineral poisons. Pure nature applied to nature's skin.

A CERTAIN CURE FOR eczema, skin diseases, abscesses, boils, hot sores, ulcers or poisoned sores, cuts, burns, scalds, scabs, scabs, ringworm, blisters, heat or sunburn, sore eyes, rheumatism, sprains, strains, and all skin diseases or injuries. All drugs at 50c. or post free from the Zam-Buk Co., Toronto. (6 boxes for \$1.50.)

Zam-Buk
RUB IT IN!

Try an Adv. in the Daily Bulletin.

The advantage of Malleable Iron is that it can be cold riveted to steel without the use of stove putty to make air-tight joints.

So all the frames in the Monarch are made of Malleable Iron—around the Oven Door, Ash Door, Pouch Feed Door, etc. The steel sides are riveted solidly and tightly to Malleable Iron Frames, which make a solid base, unaffected by heat or cold.

Now, this air-tight construction makes air-leaks impossible in the Monarch, hence it saves you \$20 to \$30 every year, and will be doing good service long after the loose-jointed steel range has been sent to the scrap-heap.

We can show you many other features about the Monarch—the Duplex Draft which lets in air at both ends of the fire-box, ensuring even cooking—the Contact Reservoir which heats water quickly—the Malleable Iron top which requires no blacking to keep clean, etc., all of which are exclusive with the Monarch. It is well worth an hour of your time to examine this range.

A \$1.00 COOK BOOK FREE

The Monarch Cook Book, written by Mrs. J. D. May, a housewife, an acknowledged authority on domestic science, and author of "The Household Cook Book," contains 100 pages bound in cloth and contains a complete book that would cost \$1.00.

It contains 538 recipes, many of them new, simple, easy to make and inexpensive.

It also contains many valuable hints on diet and marketing. You can get it without cost if you intend to buy a Monarch Range.

HOW TO GET IT. Cut out this advertisement, mail it to the Monarch Iron Works, 1000 Main Street, Edmonton, Alta., and we will send you the "Imperva" Rain Coat.

NOTICE.

DEPARTMENT OF INDIAN AFFAIRS.

TENDERS FOR FLOUR.

SEALED TENDERS endorsed "Tenders for Flour" and addressed to the undersigned will be received up to noon on October 22nd, 1906, for delivery on or before the 15th instant, of flour, or any portion thereof, at the points named herein, together with such further quantities as may be required during the fiscal year ending the 31st March, 1907.

Flour to be equal to the standard sample, (which may be viewed in the Department of Indian Affairs at Ottawa, the Indian Commissioner's Office at Winnipeg, the Indian Agents' Offices at Battleford, Duck Lake and Birtle respectively, the office of the Inspector of Indian Agencies at Fort Macleod and at the Dominion Lands Offices at Brandon, Regina, Calgary, Edmonton, Prince Albert and Yorkton); to be fresh ground, put up in sacks containing 100 lbs. net, and double sacked. The inner sacks to be of grey cotton, three yards to the pound, free from dressing, and to weigh six cunces when made up; the outer sack to be of jute sewn with strong twine and to weigh fourteen ounces; sack known to the trades as "two bushel bag"; the outer sack to be legibly branded with the name of the manufacturer, and net weight or flour within.

Each tender must be accompanied by an accepted cheque in favour of the Secretary of Indian Affairs on a Canadian Bank, for at least five per cent of the amount of the tender, which will be forfeited if the party tendering declines to enter into a contract based on such tender when called upon to do so, or if fails to complete the work contracted for.

J. D. MCLEAN,
Secretary.

Semi-ready dress clothes are the highest expression of art in tailoring

THE best tailor in town makes only 3 or 4 dress suits, in a year. They are novelties with him, and their style and making are pretty much an experiment. That is why so many gentlemen look like waiters when they put on dress clothes. The design of the semi-ready dress suit is the work of a sartorial artist of the highest rank. The suits are tailored by men who do nothing else—they are specialists in the tailoring of dress clothes.

Semi-ready dress clothes are made of light-weight unfinished worsteds. The coat is delicately designed, as the parts are smaller than in any other style. The balance and lines are such as to show the figure at its best. The shoulders are broad yet natural form.

The semi-ready dress suit is made with a longer lapel, rolling to within two and a half inches of the waist, with a considerable convex on crease, and a sufficient point at bottom of lapel instead of the usual sharp point.

On account of the carefully designed lines, the coat adheres closely to the figure, the skirt is more shapely and gets smoothly over the hips.

The skirts are longer, tapering towards the bottom with slightly rounded corners. The illustration shows these lines.

If you wear a dress suit at all, it should be correct in style and tailoring.

We would like to show you how sumptuous the semi-ready dress suit and tuxedo are. Will you call in?

ALBERTA GOVERNMENT AND THE FARMER

(From the Kansas City Star)

In Canada the government churns the butter for the farmer, and if he so desires will market his eggs for him. Not even in its palmy days did the Populist party ever ask the government to do the thing which the new provinces of Alberta and Saskatchewan are engaged in doing in order to make certain that the farming population may prosper.

Before the provinces became states the Dominion government did the churning for the farmers of the territories, but with the creation of the provinces the provincial government took up the work, and 18

crucialities operated by the provincial government manufactured 1,500,000 pounds of butter and marketed it last year at 20 cents a pound.

The provincial government establishes refrigerators for storing the butter and holds it without expense to the farmers until there is a market demand.

The chief warehouse is in the city of Calgary, but there are branches in other towns. The government system is simple, and when one views the failures and wrecks of creameries in some of the states of the central west and west because inexperienced persons try to do the things they are unable to do he is stopped from protesting against the paternalism of the government project.

The provincial government does not supply the money for building the

superior junction.

KELLY & MOORE, Edmonton

Farm News

COOKED FOOD FOR SWINE.

A recent bulletin issued by the Dominion Department of Agriculture contains some very practical and useful information on cooking feed for swine. It says:

The advisability of cooking or steaming food for swine was for many years the subject of much controversy, many of the most successful feeders in both Canada and the United States, held widely divergent opinions, and differed quite as widely in their practice. During the past decade, however, the process, except in the case of potatoes, has been pretty conclusively proven that, unless under exceptional circumstances, better results are obtained from a given amount of grain or roots given raw than from a similar amount after it has been cooked.

It was formerly believed, and still is by many feeders, that the process of cooking increases the digestibility of the food—but it has been shown that as a rule the contrary is true, especially in the case of food rich in protein. Extensive experiments conducted both in Germany and in America have been remarkably uniform in their results, and unite to show that protein is less digestible after exposure to high temperature. The digestibility of starch is to some extent increased by cooking and for this reason potatoes should always be cooked for hog feeding. It must be conceded that some food-stuffs, such as turnips and pumpkins, are made much more acceptable to pigs by cooking and will therefore in some cases give better results cooked than raw. There is also some advantage in giving feed warm during the cold weather; fowl 8c live weight; chicken 12c, turkeys, 14c; ducks 8c, geese, 10 and 11 cents, country points.

Hides—Great country hides at 83-4c and 9-3-4c; sheepskins and shearlings, 10c to 40c.

Wool—Manitoba 12c to 13c for coarse, fine and medium, 13c and 15c.

Eggs—Fresh at 20c.

Poultry—Dressed poultry will soon be plentiful in the market, and prices lower; fowl 8c live weight; chicken 12c, turkeys, 14c; ducks 8c, geese, 10 and 11 cents, country points.

Hides—Great country hides at 83-4c and 9-3-4c; sheepskins and shearlings, 10c to 40c.

Wool—Manitoba 12c to 13c for coarse,

fine and medium, 13c and 15c.

Live Stock.

Cattle—We quote: Best butchers' cattle, 31-4c; lower grades 3c; good export cattle are quoted at 31-4c and 3-12c; cows, 3c; weighed off cars, Winnipeg, buyers here assuming freight charges.

Sheep—Choice mutton sheep are worth 6 cents per lb.; and lower grades 5c; lambs 7-1-2c.

Hogs—Live hogs weighing from 150 to 250 pounds are bringing 7-1-2c; and 250 to 300 pound hogs, 6-1-2c off cars Winnipeg.

Grain and Feed.

There is little or no change in the grain and feed situation. Oats are a shade firmer and flaxseed has advanced. Other grains remain steady.

Quotations.

Millfeed—Barley, \$16.50 per ton in bulk, delivered to the trade; shorts \$18.50.

Ground Feed—Oat chop, \$25 per ton, delivered to the trade, barley chop, \$20 mixed barley and oats, \$24; oil cake, \$27 per ton.

Oats—No. 1 oats, 3c; No. 2 oats, 3-1-2c per bushel, carlots on track here.

Barley—No. 3, 36 cents per bushel; No. 4, 34 cents per bushel; car lots on track.

Flaxseed—\$1.08 per bushel for No. 1.

Fresh boiled carlions on track \$9 and \$10; loose hay, farmer's loads \$10 to \$12; timothy, new \$12 and \$14.

THE ORIGIN OF BREAD (Commercial)

Before the dawn of history the art of bread and baking, for cookery is one of the oldest arts, and we cannot imagine life without bread. Who can tell the origin of the raised or leavened loaf? Chaldean claims the discovery, says one authority, "and it is certain that Chaldean bread was famous for its excellence." Egypt knew the process, for Moses interdicted it during the Passover season. Pilny says that in his day the French used yeast made from fermented malt, but they surely must have forgotten it or considered it too much trouble, for it was not a general method until the seventeenth century. Those old folks had some queer ideas. The faculty of medicine declared yeast-made bread to be bad for the health, and Louis XIV. prohibited its use.

It took many years to educate the people in the art of bread-making as we practice it today. Although the wheat loaf is the ideal bread, there are many honored members of the cereal family. Barley has an ancient lineage, and "brava John Barleycorn" was once the hero of the common people. Because of its cheapness it has always been the staple food of European nations. The famous black bread of the Spartan soldiers was made of barley, but the Romans hated it, and gave it to "the cowardly and careless."

The brave and fortunate shall eat of the finest wheat," was an old Roman saying.

Buckwheat is breadstuff. In Saxony and Silesia it forms a part of every meal; in Italy and Holland it is made into a crumpet, which is highly esteemed by all classes.

TO WINNIPEG NEXT YEAR.

London, Eng., Oct. 11.—At the semi-annual meeting of the stockholders of the G. T. R. held today, President Sir Charles Rivers Wilson complained of increased taxation imposed by the Canadian government, particularly the increase in the tariff on rails. If the company continued to buy rails in the United States it would mean an increase in cost of \$1,250,000 for renewals on the present system and an increase over the estimated cost of the construction of the Grand Trunk Pacific railway of \$4,000,000. The president also complained of a great increase in the taxation imposed by the Ontario government and said he anticipated in another year to see the completion of the Grand Trunk Pacific railway from Edmonton to Winnipeg, but he feared that the government would not be ready with the section from Winnipeg to Lake Superior Junction.

The provincial government estab-

lishes refrigerators for storing the butter and holds it without expense to the farmers until there is a market demand.

The butter-makers and gives their services gratis to the creameries. It sees that there is a sufficient supply of pure water and suitable drainage. The government stamp, which is a guarantee of purity and sanitation, goes on every pound of butter manufactured.

WINNipeg MARKETS (Commercial)

Vegetables—Potatoes 45c a bushel; cucumbers 10 cents a dozen; carrots 6c a dozen; red cabbage 9c per dozen; beets 5c per bushel.

Cheese—Ontario, 15c and 15-1-2c; Manitoba, 15c.

Butter—Prices are rising. Creamery, 2c, 27c; 1b.; bulk 25c and 26c a lb.; dairy, select 19c; pastry 15c. a lb.

Eggs—Fresh at 20c.

Poultry—Dressed poultry will soon be plentiful in the market, and prices lower; fowl 8c live weight; chicken 12c, turkeys, 14c; ducks 8c, geese, 10 and 11 cents, country points.

FORESTRY EXPERT IN GREAT NORTH COUNTRY

E. Stewart, Chief of Government Forestry Branch Travels Overland to the Arctic Circle—Covered 5,000 Miles—Through the Oil Fields

Winnipeg Free Press:—E. Stewart, superintendent of forestry for the Dominion government, arrived in Winnipeg on Saturday, on his return to Ottawa from Vancouver, where he presided at the recent forestry convention held there. Previous to that time Mr. Stewart had just completed one of the most remarkable trips in Canada. In the pursuance of this duty he had travelled over the whole of that portion of Western Canada which is accessible by the Hudson's Bay packets between Edmonton and the mouth of the Mackenzie river. From there he crossed the Rockies to Alaska and the Yukon returning to British Columbia by steamer.

It was in June last that Mr. Stewart left civilization on his trip through the wilds of the "frozen north," covering some 5,000 miles by boat and canoe in less than four months. It is a trip which has heretofore been taken only by the employees of the Hudson's Bay Co., or by a special detachment of the mounted police.

"The trip was of one unending interest," said Mr. Stewart to a Free Press reporter. "For some years past I have wanted to know something more of that great country beyond which has come from time to time of more them or less garbled. As I said before, we left Edmonton in June for Athabasca Landing. From there to Fort McPherson our whole trip was by way of Hudson's Bay transports, and I wish to say that I was surprised and pleased with the accommodation provided. Before leaving Fort McPherson, commanding officer for the company, had given me a letter to their various agents along the route and I was treated with every consideration.

"But to continue with some of the details of the trip the whole story of which would make a large volume. The first section from the Lakes to Grand Rapids was made by steamer, and is over a route which is travelled to a considerable extent. The interest in the oil fields of the 'tar belt' is taking a great many people that way, and in addition there are a number of prospectors and others having for the first time taken passage to the Peace River country, which is very much in the public eye at present. With regard to this Peace River country, I would like to correct a false impression which seems to have gone abroad with regard to its richness. There seems to be the idea that the whole of that district is one great broad, flat expanse of open prairie, just waiting for the plow. Such is not the case. It is a prairie, but a great portion of it is wooded or semi-wooded and will have to be cleared before it can be cropped. There are still sections which remain open, and these are unquestionably very rich, and under crop will prove to be most profitable. While not wishing to usurp the province of the geological survey department, now at work in that country, I am of the opinion that it is always wise to be very valuable from the mineral bearing deposits. Coal, gold, copper and many other minerals have been found in that country and there are undoubtedly many other deposits which will be revealed upon more careful prospecting."

"But to continue with our trip. Fort McMurray and the vicinity I found most interesting. It is in this vicinity that the tar or asphalt deposits are found and here there are several parties prospecting for oil. I am glad to hear that some of them have been successful. In their search I brought back specimens from that district showing the appearance of the deposit as it is found on the surface. The trip from Grand Rapids to Fort McMurray was made in snows, the river being full of rapids that was impossible to take the steamer down.

"From Fort McMurray the trip was an easy one, the steamer Graham taking us down the river to Lake Athabasca and from there to Smith's Landing on the Slave River. At that point we were compelled to make a portage of about two miles to the North Rapids to Fort Smith, where we caught the steamer Wrigley, the famous little vessel which makes the trip of 1,300 miles to Fort McPherson, carrying supplies and mail to the far northern posts of the Hudson's Bay Company, once each year.

The trip was one which gives the traveler an idea of the extent of this unknown land. The scenery is beyond description. The steamer works its way through all kinds of country. Plains and prairie, tundra and mountains; here the river winds through a low, flat country and there cuts through a narrow defile. There were no scenes to compare with anything in the world. It was all intensely interesting. A large portion of the scenery is more or less timbered. Spruce, poplar and birch being most in evidence with spruce predominating. We cut our wood for the steamer at points along the river bank.

"At Fort McPherson we also visited the Delta of the Mackenzie river, and saw Point Separation, where Franklin and Richards divided their party at the time of the ill-fated expedition from which the former never returned. At that point I saw several Indians of Esquimaux, who were camping along the river. They had been down to trade at the Hudson's Bay post. One of the features which struck me most forcibly in this part of the country was the intensely religious character of most of the Indians. Daily services are held and they never seem to sit down to meals without first saying grace.

"At Fort McPherson there were two camps open for me. Either to return in canoes the same way I had come making a long slow trip along the current or to cross the height of land and return by way of the Yukon. I finally decided upon the latter. Through the kind assistance of the

next year except to lay the steel and do the ballasting. From Edmonton they proceeded into the Rocky Mountains, with a view of coming to some decision as to the route to be adopted. It is expected they will proceed to Vancouver, B.C., and thence to Prince Rupert, the Pacific coast terminal, by steamer. H. Phillips (secretary) and R. B. Kellher (chief engineer) were also of the party, which is expected to return to Montreal about October 20.

Reports from Winnipeg state that it has been decided to erect shops for the Grand Trunk Pacific Railway, about five miles east of the city; that a site has been selected; that Gilbert and Company will be given the contract, and that work will be started immediately.

At Portage la Prairie the company has paid duty on an importation of 54,500 tons of steel rails from the United States for the line westerly from that point. Track-laying is being gone on with on the line from Portage la Prairie to the Touchwood Hills, the grading contract for which is being carried out by McDonald, McMillen and Company. On the next section of 140 miles to near Saskatoon, for which the Canadian White Company has the contract, it is expected to have the grading completed by the end of the year. The route from Saskatoon to Edmonton, 210 miles, is well covered with men by the contractors, Foley Brothers and Larson.

Survey parties are in the field going over routes for branch lines from Yorkton. One of these branches is intended to connect with Regina; and another to Hudson Bay. The company has secured about 300 acres of land near Saskatoon, which is described on the register as the G.T.P. townsite. When F. M. Morse (vice-president) was at Saskatoon, September 17, he stated that it was proposed to locate a town line in the town. The company has also survey parties in the field locating a line into Calgary, Alta. The Edmonton, Alta., city council has ratified a by-law granting the company a bonus of \$100,000 and a right of way into the city, on condition that it establishes divisional terminals there.

Reports from the Pacific coast state that large contracts for ties and other timber have been placed, and that the saw mills at Port Simpson and Esquimalt, B.C., have large railway orders on hand. J. H. Bacon, the company's harbor engineer, has returned to Vancouver from Prince Rupert, where he has been inspecting the harbor accommodation, and preparing plans for wharves, etc. C. B. Dodge, a Dominion government engineer, is at Prince Rupert making charts of the harbor, which is reported to be commodious, and to have safe approaches. Considerable work is in progress on the shore, and E. G. Russell, who has returned to Vancouver from Prince Rupert, says that the company is taking every precaution to have a model city laid out.

Construction work upon the section from Quebec to La Tuque, about 150 miles, is reported to be progressing satisfactorily. For the first 70 miles from Quebec the lines passes through a more or less settled country, but beyond that the route is through the forest. In addition to the Cap Rouge viaduct, there will be a number of steel bridges on this section. For the superstructure of these the commissioners have just let contracts. The Dominion Bridge Company, Montreal, will supply the steel for the bridges at Batiscan, Jacques Cartier, Riviere Charette and the crossing of the C.P.R. in Portneuf county, and the Locomotive and Machine Company, of Montreal, will supply those at the bridges at Riviere Noir, Riviere aux Pommes, Ste. Anne and Portneuf.

The commissioners are preparing to invite tenders for the grading and other work upon about 200 miles running east and west from Lake Abitibi, but it is said that the Ontario government intends to push forward its construction to the lake as early as possible.

The other portion of the line under contract is from Winnipeg, Manitoba, eastward to Lake Superior Junction, where it connects with the line under construction for the Grand Trunk Pacific Railway, known as the Lake Superior branch.

C. M. Hays (president) and F. M. Morse (vice-president), Grand Trunk Pacific Railway, left Montreal at the end of August on a trip of inspection. After looking over the work in progress on the Lake Superior branch in the vicinity of Fort William they went to Winnipeg, reaching there September 2, where it was stated by the vice-president that there was no foundation for the report that the company was arranging to secure a right of way over the Canadian Northern Railway between Winnipeg and Portage la Prairie. On reaching Portage la Prairie, the president and vice-president drove over the right of way to Edmonton, Alta., which was reached September 20. The progress of the work at different points was examined, and the suggestions for branch lines at several places were looked into. Speaking of the trip, it was stated that 50 per cent. of the grading between Portage la Prairie and Saskatoon was completed, and 30 per cent. was done between Saskatoon and Edmonton. There is considerable scarcity of labor, but notwithstanding, it is expected that all the heavy work will be completed this fall, leaving practically nothing to do

COAL A SECOND CROW'S NEST

Coal is actually today the greatest commodity of the world. With coal we run our mills and factories and our great railroads; with coal we propel our ships, provide our navies, and warm our homes; with coal we generate and produce electricity, with a few exceptions, where water power is available, but there are not very many, Niagara Falls, however; with coal we produce iron, copper, lead, silver, gold, and all other metals that we need, and must have, because all of those metals are to be found mixed in with the rock and in the ore.

Without coal we could not make coke, and coke made from a certain kind of high class bituminous coal is the only fuel yet known to man that produces a heat intense enough to melt ore and hard rock into a liquid, by which process we are enabled to extract the metals we need.

England would not be the great world power she is today if it was not for her inexhaustible supply of coal.

Coal is the basis of all industrial and commercial wealth.

Coal-mining in British Columbia has always been a great success. It is a great deal like diamond mining in South Africa—a bonanza of the first magnitude.

The great mountain barrier of the Rockies shuts out the eastern coal, leaving the great Pacific coast to be supplied by the British Columbia fields, excepting a small tonnage from the State of Washington of a very inferior quality; in fact, so poor that the United States navy of the Pacific division get all of their supply from the Dinsmore Coal Mines on Vancouver Island, and pay the duty on it, but neither the Washington nor the Vancouver Island coal is of any use for furnace and smelters coke, because the coal from both of these places contains a great deal of sulphur, and does not make good smelters coke.

Nevertheless Dinsmore made millions after millions every year from mining coal, and died a few years ago the richest man in Canada. He made it all from coal, and his mine will be productive for generations to come, and are worth more today than thirty-five years ago, when first opened up.

OPPORTUNITY.

To see it, and grasp it in time, makes a man the master of his destiny. DO YOU WANT TO MAKE MONEY HONESTLY, AND LOTS OF IT? Would you like to become interested in a coal proposition in British Columbia, and make \$10,000 in three to four years from now on an investment of \$250.00? We offer you the opportunity to do this.

You have \$200.00, \$500.00 or \$1,000.00, whatever the case may be, in bank, drawing 3 per cent. interest yearly. Does this satisfy you, when you can many times double your money in one year in an investment like this we offer you?

PUT YOUR SAVINGS IN COAL. It is safe, and as good as Government bonds. There are no "ifs" about coal mining. There never was known a failure in coal in British Columbia, if quantity and quality and shipping facilities were assured, and the business was managed right and honestly.

The price of coal and its commercial value is always advancing from year to year, whereas the demand is increasing enormously every year.

Millions and millions of dollars have been made in coal mining year after year by all those engaged in the business, and to prove this we refer to the statistics on hand for the year of 1902, where it is shown that nine of the leading bituminous coal mines in the United States and Canada made the enormous profits of \$75,450,687 (one year's earnings).

There is no field of investment more absolutely safe and profitable than coal mining.

We now offer to the public 100,000 shares of the British Columbia Amalgamated Coal Company's treasury stock at the low rate of TWENTY-FIVE CENTS PER SHARE.

The par value of this stock is one dollar, and is fully paid and non-assessable, and shareholders are exempt from personal liability. Once paid and secured it is settled for ever.

This Amalgamated Coal Company controls 17,500 ACRES OF COAL LAND in Nicola Valley, B.C., and, according to coal experts' reports, this great area is underlaid with inexhaustable quantities of high-class bituminous coal, the best for steam, blacksmithing and cooking purposes, estimated to contain approximately 1,400,000 TONS OF COAL.

TWO RAILROADS.

are now being built into the Nicola Valley, the Canadian Pacific and the V. V. and E. (Great Northern) and the C.P.R. has already constructed and completed a line from Spence's Bridge, on Thompson River, to Nicola Lake, a distance of about fifty miles, whereas the V. V. and E. are rushing the work as fast as money and labor can do it, and it is expected to reach Nicola by Christmas.

This is certainly a rare opportunity for the small investors. For \$250.00 you can now buy 1,000 shares of the Amalgamated Coal stock, which in a few years may pay you a yearly revenue or income of \$10,000, figuring the dividend at \$10.00 a share (the Crow's Nest Pass Coal Company paid a dividend last year of \$10.60 a share). This is an illustration to show what a few hundred dollars invested in coal stock means to investors. The Crow's Nest stock was offered to the people in the year 1896 at ten cents a share, and is today worth over \$300.00 or \$350.00 for 1,000 shares. You can get 1,000 shares of our stock today for \$250.00, which may be worth as much as the Crow's Nest is today if you hold it long enough. Do you realize what this means for you? That the British Columbia Amalgamated Coal Company's stock will reach the \$100.00 mark in six to seven years from now is the belief of those who have seen and examined the properties and are familiar with the local condition in that country. Get it on the ground floor. Act quickly, and do it now. Do not ask your neighbor for his advice. Use and act on your own judgment. It will soon be taken. Call early or write, and we will give you any further information that you may desire.

BETTER THAN LIFE INSURANCE.

A source of income that will last as long as you live. An asset that can leave behind for your friends and relatives. Have you a wife, a dear child, a sister, brother, or friend, whose welfare you care for? If so, why not invest \$50, \$100, or \$200, or any sum you can afford, in this coal stock, and get a certificate issued in their names; that will get them an income for life.

TWO YEARS FROM NOW.

The stock should begin to pay handsome dividends, and in another year or two may have a cash valuation on the market from the dividends it then will pay of at least \$10.00 per share. This calculation is based on sound and conservative business judgment, and on well-tried laws of natural growth. It is quite safe to say that when the Amalgamated Coal Company shall have fully equipped its four properties on Cold Water River, in Nicola Valley, B.C., and has built up a market for its product, and can produce coal and coke on a large scale, which may require six to seven years to accomplish (taking the Crow's Nest Coal Company as an example), the stock should then be worth on its own merit, the dividend it then will pay, \$100.00 per share.

Opportunity knocks once at every man's door. To see it and grasp it in time is the keynote to success and wealth. This is meant for you. This is your greatest opportunity.

Fathers, mothers and guardians, who have the welfare of your children at heart, and want to provide for their future needs, write us for information, and investigate our proposition carefully. You will thank us later for the advice given. Ask or write for printed prospectus and reports, etc. We will show you samples of the coal and of the coke, and the assay of the coal from Government officials and other authorities.

RECOMMENDED BY BANKERS AND MERCHANTS.

as the safest and best investment on the market today, which is being offered to the public at large. We want men and women of moderate means to get interested in this great enterprise, and to get in now, on its fine investment.

Remember, for \$250.00 you will get one thousand shares of Amalgamated Coal, which will secure for you and your family a source of income, and may make you independently rich. Remember, 1,000 shares of Crow's Nest Coal is today worth \$250,000, and brings a yearly revenue of over \$10,000.00.

PROTECTION TO SMALL SHAREHOLDERS IS SECURED BY LAWS OF BRITISH COLUMBIA.

Under British Columbia laws every Coal Company mining for coal and oil in that country must file with the Minister of Finance, a certified copy of their articles of incorporation, if a foreign company, and also of the by-laws, in other words, the company has to register under the laws of British Columbia, before they can transact business within the borders of the Province, and produce coal, and their books are subject to inspection every three months by the Government agent, to whom a sworn statement must be made, and a tax of five cents per ton paid to the Government for every ton of coal mined. This protects the small stockholders, as everyone interested, whether he may be the owner of 10,000 shares or only 100 shares, has the right to know at all times just what the company is doing, and there is no possible way of the company adopting, with any success, a "freeze-out" game. The Government being an interested party, much greater protection is afforded the small investor than in any other country.

We cordially invite you to call at our office, No. 61-62 Confederation Life Building, Toronto. If you cannot call, please write us, and we will mail you prospectus, reports, maps, etc., that will give you all information you may desire.

SATURDAY --- A Day of Saving Opportunities

Linen Towels

Six dozen linen towels bought specially for tomorrow's sale. Extra large size, good quality, colored border and fringed ends. Saturday's sale price per pair 25c

We'll be open from 8 a.m. until 10 p.m. tomorrow, and we've prepared for the busiest day's selling ever known at this store. Low prices is the magnet that will draw the crowds. Dependable merchandise and timeliness of the offerings will be the big satisfaction givers, and those who best appreciate the values will shop early.

MONEY BACK IF NOT SATISFIED.

Union Flannel

Hundreds of yards of dark and light shades of grey union flannel on sale on our special bargain counter. Saturday at per yard

15c

Odd Curtains and Curtain Ends--Hundreds on Sale Saturday--25c Each

Pillow Cases

Ready-made Pillow Cases, made of full bleached English cotton, good quality, round even thread, 2 inch hem; extra value. 20c. each or per pair 35c.

Hemmed Sheets

Bleached Torn-off Sheets, large size, 2 in. top hem, 1 inch bottom hem; ready for use. This is one of our best values; each 85c.

Table Linen

Pure White Damask, 60 inches wide, in pretty spray patterns. Table linens of extra value at the price, per yard 45c.

Table Napkins

Fine linen, good pattern, right size, another of our best linen values. Special price per dozen \$1.00

Sheetings

Our Special for Saturday in Plain White Sheetings is a two yard wide plain white Sheetings, at per yard 30c.

Bureau Scarfs

We bought a special lot of pretty Bureau Scarfs, at a Special Price. On sale Saturday at each 50c.

All Wool Blankets

Large fluffy, all wool blankets, just the kind you would expect for \$1.00. Our price only, each 50c.

Flannelette Sheets

In White or Grey, with Colored Borders, large size, per pair \$1.00

Colored Alhambra Quilts—Saturday's Sale Price, Each 75c

English Colored Alhambra Quilts; assorted patterns, in blue and white and red and white, with combination border, single bed size. We bought 50 of these quilts specially for To-morrow's Bargain Sale.

White Crochet Quilts—Saturday's Sale Price, Each 90c

Soft finish, white Crochet Quilts in handsome raised patterns, wide border, hemmed ready for use, double bed size. This is another lot—40 Quilts—we secured at a low price. The actual value of this quilt is \$1.20. For Sale on Saturday only, for 90c. each.

Soft Finished White Crochet Quilts—Sale Price, Each \$1.00

This Quilt is one of our Leading Bargains in our Saturday Sale. Canadian White Crochet Quilts, hemmed ends; fine close weave, soft finish, full double bed size. Regular value \$1.35. Saturday \$1.00.

A Splendid Value in Waded Comforters—Sale Price \$1.25

Reversible Comforters, made of English Art Printed Cambrie, assorted colorings and designs, filled with pure white wadding. Only 12 Comforters in this lot. Come early if you want one.

Another Sale of Grey Wool Blankets on Saturday at \$1.25

Not such another Blanket to be found anywhere at the price. Good size, good quality, dark grey, with colored border. We have only fifty left. Don't miss the last opportunity to get a pair or two of these Blankets.

\$1.00 Each. SILK WAISTS. Each \$1.00

These Waists are all right in style except the sleeve. With a "little fixing" you can change the sleeve into the Latest Style, and have a Waist "up-to-the-minute" in style at a small fraction of the price of a new one.

\$3.50 Pale Blue Silk Waist, size 34, Saturday Sale Price	\$1.00

The Play

The New Theatre

House Well Filled and Show a Success Both as a Musical Production and Entertainment.

In a bubbling melodious comedy with jingle enough to send the audience away humming and not plot enough to force them to think, Claude Amsden company opened the new Edmonton theatre last night successfully.

The house though not completed was inclosed and sufficient progress made to guarantee that when the finishing touches are put on it will be a very comfortable and commodious one. The stage is large and the gridiron is high enough to allow handling large scenery. The lighting arrangements are good and the acoustic properties of the new house are first-class.

Claude Amsden's production last night was a musical travesty of his own. He borrowed from the best authors among the "Popular," and wound into it a plot of domestic discord in which the "governor," a gay but rather hen-pecked old gentleman gets mixed up with his wife is away in a little scrap down at Sherry's and loses his hat. The situations that arise in his attempts to recover his hat and the "governor's" efforts to square everything with his wife, are very ludicrous.

There are twelve people in the company, but the heaviest work is done by four of them. Claude Amsden as Sam Jollyman, the "governor," Walter C. Wilson as Fred Bell the nephew, Miss Bessie Bacon as Thelma and Miss Hazel Davenport as Mrs. Jollyman the "governor's" wife.

No one will ever claim for Amsden that he is a singer although he has the faculty for putting the gingle into whatever he gets off, but his abilities as a comedian are unquestioned. Last night he was at his very best.

Amsden was screamingly and exasperatingly funny last night so funny that his own people had difficulty to get through their parts sometimes without a laugh themselves. His audience was convulsed to the last act.

"Thursday" always wins. My Jonah day," in which he led the chorus, was his best musical effort and it made a hit.

Walker C. Wilson is a baritone singer with a beautiful voice, melodious, strong and deep, and his rendition of the Queen of the Earth song was grand.

Bessie Bacon has a wonderfully sweet voice with an astonishing range and gave a couple of numbers that were above average. Hot weather of Yon Case, borrowed by Amsden to suit his travesty being particularly well sung.

Hazel Davenport is already well-known to theatre goers in this city and Amsden's production seems to have been particularly constructed for her benefit. Her "Chryenne," resound from the vaudeville, in which she was supported by a chorus of girls was particularly good.

The only jarring note was when Mr. Sherman of Calgary mounted the stage between the second and third acts and attempted to make an announcement.

THE PRINGLE CO. ON MONDAY. The Pringle Company comes to the Edmonton Opera House, Oct. 15 to open with a comedy drama in four acts. The Convict's Daughter which is said to be replete with deft touches of humor and pathos, combined with a story of absorbing heart interest. The Convict's Daughter is a play said to be full of bright comedy and is interpreted by a strong company under the management of Johnnie Pringle. There will be specialties between acts.

WESTMINSTER ABBEY CHOIR. Mr. W. J. Robson advance agent for the Westminster Abbey Choir is in the city and in conversation says: "We are looking forward to our western tour with a great deal of pleasure. Our tour in the east has been a success as it always is when we visit Canada. After giving our concerts in Edmonton we will fill some time in British Columbia, sailing for the Orient, Oct. 29. This is our second tour and will take about a year to complete. Our first tour embraced a consecutive series of 330 concerts and spread over a distance of 62,000 miles. Our company number twelve people, the finest artists that can be obtained."

NEW WARSHIP. London, Oct. 11—The Daily Telegram today says that three armed cruisers, now under construction, the Infelix and Indomitable on the Clyde and the Invincible at Elswick, about which much secrecy has been maintained by the admiralty, are in reality battleships of as heavy broadside as the Dreadnaught, but very much faster. These vessels will in fact be the most wonderful ships ever built by any navy. They will have greater offensive power than any two battleships now in commission in any fleet in the world, combined with extraordinary speed, far in excess of anything hitherto attained by any warship.

"The Virginian"

Faithful Portraiture of the Western Story Greeted by Frequent Applause.

Those who have spent most of their lives in the west, and have become imbued with its infinite charm, will appreciate Clifford Lane Bruce's realistic portrayal last night of the horseman, and companion, the most romantic figure of the passing west.

There is no need to relate the story of the plot. The majority of the select audience last evening were familiar with it. The acting was the thing. The dramatization of the novel is not good but each actor took the part given with singular idea of the romantic character of the cowboy life.

The romantic characteristics of the company were admirably brought out in the work of Clifford Lane Bruce and Geo. A. Dayton as the two central figures in the play. Mr. Bruce appeared in the title role and excelled his previous efforts at the Thistle this week.

The parting scene between Steve and the Virginian showed how stern and yet tender was the cowboy's sense of honor. While his heart resented his hand was firm and nothing could save his former pal from the penalty of the arch crime in the cattle land. Many a tear was hastily wiped away before the lights came after the scene in "Horse Thief Pass".

George Dayton as "Trampass" played the part of a bad man to a finish—the same bad and that came to all who defied the unwritten but obvious laws of the plains.

That the audience appreciated the realistic portrayal was shown by the frequent applause and by the round of cheers which greeted the hero as the curtain fell.

Tonight the Merchant of Venice will be given after the arrangement of Richard Mansfield, Harold Nelson will take the role of Shylock, one of Shakespeare's most complex characterizations and the actor will have unlimited opportunity to exhibit his intellectual conception of the character, and his power of interpretation. Pearl Reeser as Portia will no doubt give an artistic and some interpretation of one of Shakespeare's best women.

SNOW IN VERMONT
(Bulldin Special)
Bennington, Vt., Oct. 12.—Following a rain storm which lasted forty-eight hours the first snow of the season fell here today. There was a brisk squalm which lasted for some time.

Strathcona

Strathcona, Oct. 12—Strathcona School girls are being held this afternoon. Mr. Jack Forsythe has returned from Vegreville and has accepted a position as accounttant for Deitz and Main.

The excavations have been begun by Wm. H. Martin & Co., contractors for the foundations of the new 40-room hotel for Mr. Eugene La Force, which is to be built at the corner of Niblock street and Caree avenue.

Mr. Percy Manning lately in the planning and contracting business in his present employment by W. H. Martin & Co.

The Strathcona House bathroom and barbershop has been moved upstairs and is now located between the laundry and bar facing Whyte Ave. It is gratifying to hear that Mr. J. Dettich, who has been suffering from a severe attack of fever is recovering.
